SUMMARY

Senior UI Engineer with 7+ years of experience building responsive, accessible, and production-ready enterprise applications using Angular and React. With a strong foundation in UI/UX design, I specialize in transforming Figma designs into pixel-perfect interfaces while bridging the gap between design and engineering.

Experienced in design systems, reusable component libraries, frontend architecture, accessibility, responsive design, and Angular modernization. Passionate about building scalable user interfaces, mentoring developers, conducting code reviews, and delivering consistent, high-quality user experiences across healthcare, government, and SaaS applications.

SKILLS

(**Design Skills** • UI/UX Design • Wireframing • Prototype • User Research • Mobile Application Design • Adaptive Design • Design System • • **Frontend** • Angular • React • HTML5 • CSS3 • SCSS • **UI Libraries** • PrimeNG • PrimeReact • Angular Material • NG Bootstrap • **Styling** • Tailwind CSS • Bootstrap • PrimeFlex • Materialize CSS • **Charts** • D3 • Chart JS • **Design** • Figma • Adobe XD • Zeplin • **Version Control** • GitLab • Bitbucket)

ORGANISATIONS

Augmented Tech Labs

October 2023 – Present | Ahmedabad, India

Senior UI Engineer (Senior UI/UX Designer)

- Converted high-fidelity Figma designs into responsive, production-ready Angular and React applications, ensuring pixel-perfect implementation with cross-browser and cross-device compatibility.
- Developed pixel-perfect user interfaces through cross-functional collaboration to meet business objectives.
- Mentored junior UI developers on frontend best practices, component-based architecture, and the effective use of Tailwind CSS, Bootstrap, PrimeNG, and PrimeReact.
- Built reusable UI components that improved code consistency and reduced development effort across the application.

Kemsys Technologies, Software Engineer

April 2022 – September 2023 | Ahmedabad, India

- Solely responsible for converting designs for more than four Figma-based web applications into clean, maintainable frontend code.
- Developed scalable, high-performance UI components while collaborating closely with developers to maintain design integrity.
- Mentored junior team members on design fundamentals, frontend coding standards, and responsive design principles.
- Developed production-ready frontend code that enhanced the overall user experience of enterprise applications.

9Brainz, UI/UX Designer

September 2020 – April 2022 | Junagadh, India

- Designed more than six web applications and three mobile application interfaces using Figma and Adobe XD.
- Created responsive layouts using Flexbox and CSS Grid to deliver modern, user-friendly interfaces.
- Converted UI designs into production-ready frontend code while collaborating closely with the functional team.

Zeronsec India Pvt. Ltd., Frontend Developer

March 2019 – August 2020 | Junagadh, India

- Converted UI designs into production-ready code for the Sci-Fi Design System (Project Threat I 2.0).
- Solely responsible for implementing the responsive user interface of the Anirita product.

PROJECTS

Compito

- Designed end-to-end UI/UX in Figma for 6 application modules—Client Portal, Document Library, Time Tracking Report, User Management, Template Library, and Global Search—translating business requirements into intuitive, scalable, and consistent user experiences.
- Migrated enterprise applications from Angular 16 to Angular 21.
- Migrated UI components from Angular Material to PrimeNG.
- Adopted Angular 21 best practices, including standalone component architecture, new control flow syntax, barrel files, reduced usage of any and unknown, and OnPush change detection.
- Implemented a scalable 7-1 SCSS architecture by removing redundant styles and eliminating the use of ::ng-deep.
- Configured PrimeUI themes to customize PrimeNG components while maintaining a consistent design system.
- Implemented a light/dark mode toggle service using Local Storage to provide a consistent theming experience.
- Built a global search feature using existing listing APIs with session-based search history and keyboard navigation support.

Artem

- Contributed to an enterprise healthcare platform used by more than 200+ government hospital staff.
- Conducted code reviews for 5 frontend developers to improve code quality and maintainability.
- Reviewed designs for 5 UI/UX designers and provided guidance on design best practices and UI consistency.
- Improved platform accessibility by implementing keyboard navigation, visible focus states, and color contrast enhancements.
- Implemented a scalable 7-1 SCSS architecture with customizable theme variables for PrimeNG.
- Developed responsive layouts optimized for small to large laptop screen sizes.
- Implemented HTML-to-PDF report generation for printable application reports.

Invoice Processing

- Implemented a scalable 7-1 SCSS architecture for PrimeReact theme customization.
- Designed responsive mobile and web application interfaces in Figma.
- Built a reusable file viewer component for use across multiple pages, reducing duplicate code and establishing a component-based single source of truth.

Valexto

- Updated the application's visual theme using PrimeNG without affecting existing functionality.
- Implemented interactive dashboard charts using Chart.js.
- Conducted research and development using Gridster2 to evaluate dashboard customization, drag-and-drop layout management, and resizable widgets, while assisting developers in persisting dashboard layouts through existing APIs.
- Developed responsive layouts optimized for multiple screen sizes.

People Planner

- Conducted research and evaluation of the FullCalendar library to assess roster view customization, theming capabilities, multiple view options, and print support.
- Implemented interactive dashboard charts using Chart.js.

AWARDS & RECOGNITION

- **Spotlight Award (Dec 2024)** — Recognized for outstanding project contributions.
- **HDFC Gift Voucher (Jul 2024)** — Recognized for outstanding project contributions.
- **Spotlight Award (Apr 2024)** — Received an Amazon Gift Voucher for outstanding project contributions.
- **Client Appreciation** — Recognized for successful production delivery and teamwork.
- **Tech Titans Recognition** — Recognized for UI design, prototyping, and frontend contributions during project delivery.

EDUCATION

Bachelor of Computer Applications (BCA)

Shastri Swami Shree Dharmajivasdasji Institute of Information Technology

Saurashtra University | Junagadh, India | June 2015 – June 2018
